## OBJECTIVE & SUMMARY

Detail-oriented Backend Developer with hands-on experience in web application development using Laravel (PHP), SQL, and AJAX. Gained practical skills through industry-level training at ARMS IT, where I contributed to backend logic, API integration, and system optimization. Strong background in database design, authentication security, and performance tuning. Additionally experienced in software quality testing and supporting seamless user interaction through asynchronous data handling. Seeking a role in a forward-thinking tech company to build robust and scalable server-side systems.

## EDUCATION

King Saud University | Diploma in Programming & Databases |GPA: 4.87/5.00 2022 – Expected 2025

## TECHNICAL SKILLS

- **Programming Languages:**  
PHP, JavaScript, Python, SQL, Dart
- **Frameworks & Libraries:**  
Laravel, Flutter,AJAX
- **Database Management:**  
MySQL, Data Modeling, phpMyAdmin,Firebase
- **Web & Mobile Development :**
  1. Full-Stack Development (Laravel & JavaScript)
  2. Mobile App Development (Flutter & Firebase)
- **Microsoft Office (Excel, Word, PowerPoint)**
- **Testing & Debugging:**  
Bug Tracking, Software Quality Testing,
- **Soft Skills**
  1. Problem-Solving & Debugging
  2. Effective Communication & Teamwork
  3. Time Management

## WORKPROFESSIONAL EXPERIENCE

### Software Developer Intern

#### Arms For Information Technology

- Contributed to backend development using Laravel and MySQL, supporting real business requirements
- Customized layouts and managed content updates for the NEMO web platform, improving UI structure and branding
- Implemented user authentication and optimized database queries to enhance performance
- Conducted software testing and resolved bugs across multiple features during pre-launch phases deadline.

January – April 2025  
(Co-op Training)

## PROJECTS

### 1. VENDy (Laravel E-Commerce Platform)

- **Technologies:** Laravel (PHP), MySQL, Eloquent ORM, AJAX, PayPal API
- Built a full e-commerce platform with product CRUD, user roles, PayPal integration, search/filter, localization, and real-time updates AJAX.

### 2.NEMO (All-in-One Service Platform)

- **Technologies Used:** Laravel(PHP), MySQL
- Developed a dynamic web application with an integrated user interface and database connection.

### 3.EZ MOVE (Graduation Project)

- **Technologies Used:** Dart, Flutter, Firebase
- Developed a smart transportation app for King Saud University, enabling easy ride booking and reducing wait times.

### 4.Real-Time Data Update App

- **Technologies Used:** AJAX, PHP
- Developed a web app enabling instant data updates without page reloads, enhancing efficiency.

### 5.MOVIES HUB (Children’s Movie Rating )

- **Technologies Used:** PHP, JavaScript, HTML, CSS, phpMyAdmin
- Created a platform for parents to rate children’s movies, ensuring safe and appropriate content.

### 6.Interactive Platform for Learning Programming

- **Technologies Used:** HTML, CSS, JavaScript
- Designed a beginner-friendly coding platform with interactive lessons and hands-on exercises.
